CHANDRA SEKHAR

MERN Full Stack Developer

Hyderabad, India |+91 8332001832 | chandrasekhar8120@gmail.com
LinkedIn : https://www.linkedin.com/in/chandra-sekhar-2310bb263/

PROFESSIONAL SUMMARY

MERN Stack Developer with 3+ years of hands-on experience building and deploying web applications using React.js, Node.js, Express.js, MongoDB and MySQL. Skilled in designing RESTful APIs, JWT authentication, Redis caching and AWS (EC2, S3) deployment, with a focus on performance, error handling and clean user experience. Experienced in collaborating with cross-functional teams to deliver software that meets client requirements

EDUCATION

Bachelor of Science & Comp (B.Sc.) – MPCS **2015-2018**

Studied foundational concepts in Mathematics, Physics, and Computer Science.
Gained practical knowledge in programmingl database systems, and basic electronics.
Developed analytical and problem-solving skills through academic projects and lab sessions..

TECHNICAL SKILLS

Frontend : React.js, JavaScript, TypeScript, React native,Next.js, HTML5, CSS3, Tailwind CSS, Material UI

Backend : Node.js, Express.js, Nest.js, REST APIs, JWT Authentication, Firebase Cloud Messaging (FCM)

Databases: MongoDB, MySQL, Redis, DynamoDB

Cloud & DevOps: AWS (EC2, S3), Nginx, PM2, Linux, CI/CD, Vercel, Render

Tools: Git, GitHub, GitLab, Firebase, Figma

WORK EXPERIENCE

MERN STACK DEVELOPER | Ciyash Technologies Pvt Ltd **Jul 2024 - Oct 2026**

Project: Pick2Win web and mobile app

Technologies: React Native,React Js, Node.js, Express.js, MySQL, Sequelize, Redis (Upstash), Firebase Cloud Messaging (FCM), JWT, REST APIs, AWS (if used in this project)

- Tech stack: Node.js, Express.js, MySQL, Redis, JWT, Firebase Cloud Messaging (FCM), REST APIs, PM2, Git
- Developed and maintained scalable RESTful APIs for the Pick2Win backend using Node.js, Express.js and MySQL.
- Designed and optimized MySQL database schemas, complex SQL queries, joins, transactions and indexing to improve application performance.
- Implemented secure JWT-based authentication, wallet management, subscription management and contest-related backend business logic.
- Integrated third-party sports data APIs to synchronize series, matches, teams, players and Playing XI, and implemented Firebase Cloud Messaging (FCM) for push notifications.
- Built analytics and reporting APIs, implemented Redis caching, centralized API logging and comprehensive error handling to improve performance and reliability.
- Deployed and maintained backend services on Linux servers using PM2 and Nginx, while troubleshooting production issues and optimizing existing APIs.

MERN Full Stack Developer | Jobminar pvt ltd **Apr 2023 - May 2024**

Project :Task Tiger website and Mobile Application

Technologies: React.js, Node.js, Express.js, REST APIs, AWS S3, AWS EC2, DynamoDB

- Developed and maintained a service management platform using React.js, Node.js, and Express.js.
- Built responsive user interfaces in React.js for managing service requests, tasks, and user interactions.
- Developed and optimized RESTful APIs using Node.js and Express.js to support frontend functionality.
- Integrated AWS S3 for media storage, AWS EC2 for server deployment, and DynamoDB for NoSQL data storage.
- Implemented error handling, secure data processing, and performance optimizations across the application.

PROJECTS

Cargo Logistics

Technologies: React Js, Node.js, Express.js, MongDB,nodemailer

- Tech stack: MongoDB (Aggregation Pipeline), VPS hosting
- Designed MongoDB data models and used aggregation pipelines for reporting and data processing in a cargo logistics application.
- Deployed and hosted the application on a VPS.

E-commerce Website – Product Management & Online Store

Technologies: React Js, Node.js, Express.js, MongDB, nodemailer,FCM token ,firebase

- Tech stack: MongoDB (Aggregation Pipeline), VPS hosting
- Designed MongoDB data models and used aggregation pipelines for reporting and data processing in a cargo logistics application.
- Deployed and hosted the application on a VPS.

DEPLOYMENT & HOSTING

- Used Vercel for frontend hosting and Render for backend API hosting during the development and testing stages. After project completion, deployed the complete application to an AWS EC2 instance for production.
- Configured CI/CD pipelines for automated deployments, managed environment variables, and configured SSL certificates to ensure secure communication.
